E. I. Tennis Team
Wins From Paris

Four E. I. tennis players went to Paris yesterday and returned with a victory. The match, which was played on the courts of the Paris Tennis Club, took only a short time over two hours to play. Paris was defeated 6-2, 6-0, 6-0, 6-0, 6-0.

Mr. Howard De Forest Widger, who has been a teacher at E. I. Since 1912 succeeds Mr. Louis L. Missel, principal of the Teachers College High School, beginning next fall. Besides teaching French, Reading, and History in the college, Mr. Widger has taught English in the High School, and has a B. A. degree from Yale University and has attended Columbia Law School one year. Before coming here Mr. Widger taught in the Massachusetts Agricultural College at Amherst, Massachusetts.

Mr. Modesitt has given up the responsibilities as principal because there was a vacancy on the masters staff of the college and because he prefers the teaching of mathematics to the administrative duties of the principal. He has come from before coming here had taught in the Terre Haute High School, had been a critic in the mathematics department of Indiana State University, and had taught in the Horace Mann High School at Columbia University. Since 1912, Mr. Modesitt has been connected with the Eastern Illinois State Teachers College, and since the organization of T. C. H. High School principal.

Summer Baseball
Gets Under Way

Summer school baseball got started last week when two teams of students battled through two tense innings, the nine led by Carroll Dunn winning from Jesse Honn's outfit. The strength of the rival aggregation was not evenly balanced but Dunn should be given credit for pitching a nice steady game. Conson's hitting and Switzerland's fielding fraternized for the winners.

Baseball players support the event as a means of transportation out and bring them back.

Tennis Tourney
To be Played in Near Future

This week will be the opening of a college tennis tournament, which is open to all boys of the school. The committee in charge was presided over by so many that, although late in the term, a contest to determine the champion of the school has been definitely organized. Last year a similar tourney was to be played, but the keepers of the school did not care to stage a contest of real value and it was not held. This year there are a great many promising new stars who will give more than enough material for the contest.

Tuesdays will probably see the drawings made and announced. It is anticipated that the number of boys playing in the tournament will be large and that the unfortunate boys who do not have means of transportation will be able to try their skill at the courts.

A membership fee of twenty-five cents will be asked in the amount received as fees will be taken for the purpose of buying a medal for the winner. The tournament will be divided into two divisions—namely class A and class B. The best players will be placed in class A and the class B players will be placed in class B. This will give class B players a better chance to make a good showing. No class A man will ever make a class B man out of himself. The rules and regulations for the tournament are on the board.

The first two courts will be reserved for the regular entrants of the meet. However, entry forms will be kept on file. Anyone may sign up for a court as usual, but he must get up in the middle of the afternoon two men wish to play off a match.

Costume Dance To Be Held Saturday

The most important social event of the summer season at E. I. High School will be the costume dance on the lawn Saturday evening from eight until eleven-thirty o'clock. The cards are going to be lighted and decorated with colored lights and Japanese lanterns.

There are to be several favor dances during the evening. The committee decided to have for favor dancing, tangoes, polkas, and waltzes. The committee has set up a grand prize for the most promising new stars who will give more than enough material for the contest.

A membership fee of twenty-five cents will be asked in the amount received as fees will be taken for the purpose of buying a medal for the winner. The tournament will be divided into two divisions—namely class A and class B. The best players will be placed in class A and the class B players will be placed in class B. This will give class B players a better chance to make a good showing. No class A man will ever make a class B man out of himself. The rules and regulations for the tournament are on the board.

The first two courts will be reserved for the regular entrants of the meet. However, entry forms will be kept on file. Anyone may sign up for a court as usual, but he must get up in the middle of the afternoon two men wish to play off a match.

MOVING PICTURE "VINCENNES" WILL BE SHOWN ON TUESDAY

A historical moving picture, "Vincennes," will be shown in the assembly Monday evening at eight o'clock. Recreation tickets will admit to this picture.
PANDORA'S IDEAS OF SCIENCE GO SKYROCKETING

PANDORA

PANDORA! Pandora will not be pleased. Know that our Pan-
dora has been to a wedding. Let's make her tell us about this week.
We spent a delightful evening lis-
ting to the saxes on Sunday evening.
Thursday. Did you notice how well the various respondents
replied to the sources?
Did you know that our library is a vari-
table treasure chest? Dime it up, its depths, and you will be repaid
unfailingly.
Another one of Pandora's friends
wishes to take up the same topic space
to tell you what she thinks or
doesn't think about certain things.
Well, well, well! What am I to
understand? Just the other day one of
my instructors made it so very
d easy that any science deals with
abstract facts which have been proven
d by exhaustive tests before being
voiced for. He spent so much time to
get that one idea safely "over the
home plate." And then a day or
so later in assembly, I heard a very en-
thusiastic statement from the platform
which sent my infant ideas of science
skyrocketing.
I heard that a certain scientific
experiment had been so well proven
glimpsed, that in this day and age,
who anyone but the igno-
rant of this "scientific rains" is
ignorant in the speculative degree. (My,
I wish Pandora were here. I can't re-
member the speaker's exact words.
Can never remember exactly, and
Pandora is so good at that.)
Anyway that is the meaning I got.
"At the end of this experimental
series, I gathered that everyone
who indulges in this "scientific cer-
ymony" has no smattering of the last-
ing benefits supposedly derived
from it.
Anyway, in the light of the advice
given from the chapel platform, I

Photographs
Life's permanent records

Most tokens of Life lack life. They
are soon faded and gone. But Pho-
tographs are living reminders that
last forever. Let us make your

As most of us would say it after
having watched the players on the
tennis courts—"Life, liberty, and
the pursuit of tennis balls."

PROFESSOR IN CHEMISTRY:
When water is transformed into ice
what great change takes place?

STUDENT: Change in cost.

"So you live in the country, do you?
What do you grow on your farm?"

"Fatigued, mostly."

And after all maybe the boy who
stood on the burning deck didn't
know how to swim.

SATURDAY DANCE
WELL ATTENDED

During the first of the dance Saturday night, it looked as if there were not to be a great many there, but those prophesying a small crowd for once had their prophecies come to nothing. The crowd was the largest during the term, being augmented by many new dancers making their debut after attending dancing classes. We are very much pleased to be able to say that the new dancers get along very well, indeed. You can't even tell that most of the new dancers are new.

As usual Sanders' six piece orchestra furnished delightful music. The party was chaperoned by Miss Scott, although we are glad that our dancers are so orderly that being chaperone is not a heavy duty.

As the evening was warm, the corner of the gymnasium where the punch was served by Luella Day and Aileen Henry was a very popular place during intermission. Another attraction in the same corner was the broken chair which people would insist on sitting in.

An unexpected specialty dance was given during the latter part of the evening caused by the fading of the lights causing intervals of darkness in which the lights were lighted intermittently by flashes of rust-colored lightning. During the time the lights were out, a sixth sense seemed to guide people over the floor as there were no accidents.
