## LOCATION

The Eastern Illinois State Teachers College is located at Charleston, the county seat of Coles County. Charleston is on the Big Four and Nickle Plate railroads and is connected with the Illinois Central Railroad at Mattoon and with Kansas and Paris by a motor bus line.

## HISTORY

To provide more adequate facilities for the training of teachers for the public schools of the state the legislature by an act approved May 22, 1895, established the Eastern Illinois State Normal School. This by an act of legislature in 1921 became "The Eastern Illinois State Teachers College at Charleston." On September 7, 1895, the five trustees provided for in the act selected a beautiful forty-acre tract of land three-quarters of a mile south of the public square of Charleston. The citizens of Charleston bought the land and presented it to the state. The building was erected at a cost of \$180,000. The grounds have a good elevation and are shaded by many fine old trees.

December 2, 1895, the contract was made for the erection of the building. The cornerstone was laid on the afternoon of May 27, 1896. The building and grounds were dedicated August 29, 1899, and on September 12, 1899, the institution was opened to students.

During the first year there were nineteen members of the faculty and two hundred forty students. At the end of the first year, June, 1900, four students were granted the diploma of the school upon completion of the course of study. In 1929, eighty-one students were graduated from the Junior College and twenty-nine from the Senior College.

During the summer of 1901, a six weeks' session was offered for teachers. Beginning with the summer of 1920, the college has offered a twelve weeks' summer quarter. A mid-spring session of six weeks was offered from 1922 to 1929.

In 1907 the state legislature appropriated one hundred thousand dollars for a woman's building. This building was completed and occupied in January, 1909. It has proved to be a distinct addition to the cultural value of the institution. In addition to

providing a beautiful home for one hundred young women during their residence in Charleston, it has had a marked influence in establishing good standards of living, and has come to be the social center of college life.

In 1911 the state legislature appropriated seventy-five thousand dollars for a training school building which was completed in 1913 with the exception of the assembly room which it still lacks.

In 1907 the power of conferring degrees was granted to the institution by the state legislature. Courses leading to the degree of Bachelor of Education (B. Ed.) were announced in 1920.

In 1925 the state legislature appropriated one hundred seventy thousand dollars for a Practical Arts Building. This building completed in 1929 is used for home economics (Smith-Hughes) and for manual and industrial arts.

The institution has always stood for sound scholarship and has striven to inculcate in the minds of its students a sincere love for truth. One of the gratifying evidences that it is in a measure fulfilling its mission is the fact that so many of its students have gone on to higher institutions of learning the better to equip themselves for service.

#### PURPOSE

The function of the state in education extends of necessity to the training of teachers. A rational system of public education implies provision for securing efficiency in the teaching office. State Teachers Colleges are the natural outgrowth of a policy of public education. The state is the only agency competent to meet the demands for qualified teachers imposed by its own attitude toward the instruction of its people. The object of a State Teachers College is not to extend the earning power of one class of persons at the public charge. It is to give a culture and learning dedicated in a special way to the general welfare. It exists primarily not for the benefit of its students but for the benefit of the whole people. Such a conception is fundamental and determines questions of organization, courses of study, and methods of instruction in the State Teachers Colleges.

#### EQUIPMENT

GROUNDS.—The grounds comprise forty acres, including the campus proper, the forest plantation, and the athletic field. These grounds, laid out by Mr. Walter Griffin, one of the most skillful landscape gardeners in the country, are justly considered exceptionally beautiful. A natural grove and other fine trees, a pond, a wide stretch of green, many borders of shrubbery and

perennials in the natural style present a succession of pictures throughout the year. In the main grounds are the tennis courts, the children's playgrounds, the athletic field for girls, and the school garden. The forest plantation, planted during the early years of the institution, now includes several acres of thrifty trees, much used in botanical and zoölogical studies. In the adjoining athletic field, one of the best among those of the small colleges of the state, are the baseball diamond, the football field, and the quarter-mile cinder track.

**MAIN BUILDING.**—The main building is a three-story structure, three hundred twenty-three feet in length, built of rough Bedford stone. It is in the Norman style, with a tower which is the neighborhood landmark. In this building are offices, the library, the assembly room, music and art rooms, class rooms, and laboratories.

**TRAINING SCHOOL BUILDING.**—The training school building of smooth Bedford stone was completed (except the assembly room) in 1913 at a cost of seventy-five thousand dollars. It is placed conveniently near the main building, and besides the rooms for the elementary school it contains class rooms and a laboratory for high school agriculture.

**PEMBERTON HALL.**—The legislature of 1907 appropriated one hundred thousand dollars for a woman's building and gymnasium—the first appropriation for a woman's building ever made in the state of Illinois. A fine stone structure was finished and occupied January 4, 1909. The building has met the fondest hopes of its most ardent advocates, and its value as a social center in the college and in setting good standards of living is well established.

Room, including heat and light, with table board and privileges of laundry, costs \$7.50 a week. For table board, \$5.50 a week is charged. Students are not required to furnish anything.

A deposit of \$5.00 is required for a reservation at Pemberton Hall. This deposit is credited to the student, but forfeited if the student cancels the reservation too late to have it used by someone else.

**PRACTICAL ARTS BUILDING.**—The Practical Arts Building, completed in 1929, furnishes excellent facilities for students who wish to specialize in manual arts and home economics for grade and high school positions and for the preparation of teachers in these subjects for the Smith-Hughes' Vocational Schools. Shops are provided for practice in all kinds of hand and machine woodwork, metal machine shops and automobile repair, sheet metal work, general metal, electrical construction and installation, printing, and mechanical drawing. These shops are all well

lighted and on the first floor of the building. The basement consists of class rooms, storage rooms, and locker rooms.

The home economics department occupies the entire second floor of this building. Here are food laboratories, sewing rooms, fitting rooms, a lecture room, a dining room, a unit kitchen, a foods class room and teachers' rooms, all arranged for the greatest convenience and efficiency in teaching.

There is floor space of approximately 27,500 square feet in the building. The first floor occupies 12,700 square feet, the second floor 7,400 square feet, and the basement a similar amount.

**MUSIC BUILDING.**—The small Manual Arts building, south of the power house, is now used for the band and orchestra. Lessons are given here in band and orchestra instruments.

**LIBRARY.**—The library now contains about 35,500 books and pamphlets. The reference books, bound periodicals, and reserve books are shelved in the reading room. Here are also found the current numbers of almost two hundred periodicals, including, in addition to those of general interest, many devoted to special subjects. The books for general circulation are kept in the stack room to which all students of the Teachers College and of the High School, and pupils of the seventh and eighth grades are admitted. For grades lower than the seventh, schoolroom libraries are provided. The library has a dictionary card catalogue and the books are classified according to the Dewey decimal system. There is a large collection of classified pictures for use in all departments. Three librarians are in charge, giving necessary aid and instruction to students in the use of books. Lessons in the use of the library are required in all curriculums as explained in the Description of Courses.

**SCHOOL GARDEN AND GREENHOUSE.**—An opportunity is given for seeing the work done by pupils of the Training School in elementary agriculture. Small plots of ground are planted and cared for by the pupils under the direction of the teacher of agriculture and the teachers of the Training School. Connected with the students' garden is a model vegetable garden, a rose garden, and a garden for experimentation and exhibition purposes. All of these divisions are used for demonstrating the proper care of plants, the methods of propagation, crop rotation, and some of the principles of plant breeding.

An excellent four-room greenhouse contains many plants of unusual interest and serves as an important adjunct to the botanical laboratories.

Additional facilities for field observation and for obtaining laboratory materials are offered by a small lake and a forest

plantation of six thousand trees within five minutes' walk of the biological laboratories.

LABORATORIES.—The botanical laboratories are well equipped for the training of teachers for high schools.

The laboratory tables are so equipped that each student has a light at his desk. The plant collections include numerous specimens of all kinds of plants so that each student may have his own material for study and may become well acquainted with plants.

The mechanical equipment consists of about three thousand microscopic slides that are of the best workmanship; compound microscopes of modern construction; a good projection lantern with several hundred lantern slides of plants and their structures; numerous pieces of apparatus for the demonstration of the physiological processes occurring in plants; and microtomes for the cutting of sections of plant tissues for the preparation of microscopic slides.

The zoölogy and physiology laboratory has sufficient equipment so that forty-four students may work at the same time, each being supplied with a compound microscope, a simple microscope, and other equipment necessary for examining specimens. There are many preserved specimens of both local and foreign fauna, including marine animals. The accession numbers of these now run over 16,000. Most of these are preserved in formalin and alcohol, but there are nearly two hundred mounted birds and mammals and over three hundred skins of these types of animals. There are also many shells, corals, and thousands of mounted insects, and other dried specimens. There are ample facilities for keeping live animals. Many models and skeletons are used and also about sixty-five of the best charts obtainable. Over twenty-five hundred lantern slides are available for illustrative purposes.

The chemistry laboratory is well equipped with all apparatus needed for demonstration and for laboratory experiments. The tables are modern and give places for thirty-two students to work. An ample supply of analytic balances is provided.

The physics laboratory is equipped for experiments in all subjects of physics. It is well wired for electrical work. Wall galvanometers are provided for electrical measurements. Gas, water, and compressed air are available. A dark room is included for photometry and various studies in light. The equipment provides for both demonstration and laboratory work in all courses.

The agriculture laboratory is supplied with tables, a set of apparatus for testing milk and its products, and apparatus for soil studies.

An additional fee of \$1.00 is charged if a student fails to complete his registration on the day or days appointed for registration. An additional fee of \$1.00 is charged if a change in programme is made after the third day of the quarter.

An additional fee of \$1.00 is charged if the student's record at the textbook library is not clear at the close of each quarter.

The original transcript of a student's record, including one carbon copy, will be mailed upon request without cost to the student; but a charge of \$1.00 is made for additional copies of this transcript sent later.

### PLEDGE

"In consideration of free tuition in the Eastern Illinois State Teachers College, I pledge to teach in the public schools of Illinois for a period equal to that covered by my attendance at the Eastern Illinois State Teachers College; and I agree to report annually to the president of the college the number of months taught in Illinois until this pledge is fulfilled. If I do not teach the required time in the public schools of Illinois within five years after leaving college, I promise to pay to the Eastern Illinois State Teachers College at the end of that period tuition at the rate of \$25.00 for each quarter (twelve weeks)."

### BOARD AND ROOM

Board and room can be obtained in private families for from \$7.00 to \$7.50 a week. Students renting rooms and keeping house

can materially reduce this amount. Room without board can be obtained for from \$2.00 to \$3.00 a week; board alone, \$5.00 a week.

At Pemberton Hall, room, including heat and light, with table board and privileges of laundry, costs \$7.50 a week, payable quarterly in advance (\$90.00 at the beginning of each quarter). For table board, \$5.50 a week is charged, payable quarterly in advance (\$66.00 at the beginning of each quarter). Students are not required to furnish anything.

The college maintains a Housing Bureau in order to assist students in finding the best rooms obtainable. Householders who have rooms to rent to students are registered with the Bureau; the rooms are inspected and when approved are put on the list of available rooms. Students may obtain this list by writing to the Housing Bureau or may come for consultation on arrival at the college.

#### SCHOLARSHIPS

ARMY AND NAVY SCHOLARSHIPS.—Men who served in the United States Army or Navy in the Great War and who were residents of Illinois at the time of entering the service are exempt from the payment of tuition, registration fee, book rent, and the special fee for piano, voice, or instrument lessons.

LINDLEY SCHOLARSHIPS.—“In order to equalize the advantages of the State Normal Schools,” encourage attendance and thereby increase their usefulness, the state legislature passed the Lindley Bill in 1905. This act provides that “there shall be awarded annually to each school township or fractional township a scholarship which shall entitle the holder thereof to gratuitous instruction in any State Normal School for a period of four years.”

ALUMNI SCHOLARSHIPS.—The Alumni Association of the Teachers College awards when it is possible four fifty-dollar scholarships to graduates of four-year high schools on the basis of scholarship and general excellence. Half of the award is paid on November 1, and the remainder on January 1. The Association took this action with a view to influencing well-qualified high school graduates to come here for teacher training. No awards were made for the years 1927–1930. The receivers of the awards are members of the freshman class of the year for which the award is made.

THE FLORENCE VANE SKEFFINGTON SCHOLARSHIP.—In memory of Florence Vane Skeffington, whose rare abilities and personality gave character to the English work of this school for seventeen years, the Florence Vane Skeffington Scholarship of one hundred dollars is awarded annually to a student whose gifts and attain-

ments promise distinction in the teaching of English. The award for 1930-1931 goes to Helen Irene Mayfield.

THE TEACHERS COLLEGE HIGH SCHOOL SCHOLARSHIP PRIZE.—The 1927 graduating class of the Teachers College High School established a fund of \$125.00, the interest from which is used each year for a scholarship prize to be given to the member of the graduating class of that year who has maintained the highest standard of scholarship throughout his or her four years in the Teachers College High School.

The third award was made to Louise Katherine Stillions of the high school graduating class of 1930.

#### LOAN FUNDS

THE STUDENTS' LOAN FUND.—The Students' Loan Fund of the Eastern Illinois State Teachers College makes it possible for a deserving student in the second half of the course to borrow, at a low rate of interest on a personal note, a sum of money that will help him to remain in college and complete the course. Students find such temporary assistance of great advantage. The foundation of this fund was secured from admission fees to the Senior Class play and to the Training School entertainment, given during commencement week.

Under the will of the late Dr. W. D. Morgan, of Charleston, there is given to the Students' Loan Fund the annual income from about six thousand dollars, which is one-seventh of the estate. An additional amount will be received at the death of certain heirs.

THE ADELIA CAROTHERS FUND.—A fund known as "The Adelia Carothers Fund" has been established by Mrs. Ida Carothers Merriam and Mr. Charles G. Carothers in memory of their mother. This fund is to be loaned to young women students of high character and scholarship during the last half of their course. The student to whom this loan is made is distinctly honored.

#### SOCIAL ACTIVITIES

ENTERTAINMENT COURSE.—For several years the college has maintained during the regular year an entertainment course in order to bring to the students entertainments of genuine interest and merit. The course is supported by the students' activities fee and by the sale to others of season tickets and single admission tickets. Under the auspices of this course such attractions as the following have been presented: United States Marine Band, Cleveland Symphony Orchestra, Flonzaley Quartette, Coburn

Players, Stratford Players, Tony Sarg's Marionettes, Carl Sandburg.

The entertainment course for 1929-30 included Sophie Breslau, contralto; Josef Lhevinne, pianist; Efrem Zimbalist, violinist; Edward Davison, poet-lecturer; the light opera, "Martha," and Charles Crawford Gorst, lecturer on birds.

The Kreutzberg-Georgi dancers were presented in a programme for which a small admission fee was charged.

A Russian male quartette, the Kedroffs, has been engaged for the entertainment course for 1930-31.

**DRAMATICS.**—A Director of Dramatics supervises all dramatic work for public presentation. Under the plan adopted, the high school and the college constitute two dramatic organizations, with elected student officers. The college organization is called "The Players." The major production of the year for each is the commencement play. Other programmes are presented during the year if suitable talent is available. The high school organization is called "The Footlights Club."

The ends in view under this plan are as follows:

1. To make possible the development of dramatic talent through a period of years rather than through the period of rehearsal for one play.

2. To attempt to maintain as nearly uniform standards as possible and to build up higher aims as progress is noted.

3. To encourage familiar acquaintance with the artists of the theatre of all times.

4. To establish a fund for permanent equipment.

**THE TEACHERS COLLEGE NEWS.**—A six-page weekly, "The Teachers College News," published by a board of student editors with a faculty adviser, is issued on Mondays. It is supported by the students' activities fee. In addition to announcements, reports of games, local news, and alumni notes, it contains editorials of high value in influencing college spirit as well as student spirit. Some class work of merit appears occasionally in this paper. It deserves the support of students, teachers, and alumni.

The class of 1924 left, as a class memorial, equipment for a room devoted to the uses of "The News" and the "Warbler."

**RECREATION.**—A committee consisting of five members of the faculty and a student from each Teachers College class has charge of student recreations which are not solely class affairs. The latter are under the supervision of the faculty advisers of each class. The students are permitted to have parties Saturday or Monday evenings in the gymnasium. In the spring and fall, there are picnics in the neighboring woods. These activities are chaperoned by members of the faculty.

**DOMAFIAN ART CLUB.**—The Domafian Art Club is a students' organization for those whose major subject is home economics, manual arts, or fine arts, and for those in other curriculums who are interested in the work of the club. The purpose is to learn more about each special field than can be learned in the class room. Exhibitions, lectures, and visits to studios, museums, and art galleries are a part of the work of the club.

**MATHEMATICS CLUB.**—The Mathematics Club was organized in the fall quarter of 1927-1928 to further interest in that field of knowledge and to make it possible for students to discuss some of the phases of mathematics which are not included in regular classes. Any one who is interested and has had one year of algebra and one of geometry is eligible to membership. During the first year the club held eight meetings, one of which was an old-time ciphering contest. The club has a membership of forty-eight students and teachers.

**E. I. VARSITY CLUB.**—The E. I. Varsity Club was organized in the fall quarter, 1927, by the letter men of the college for the purpose of promoting in all possible ways the betterment of athletics at E. I. Meetings are called by the president. Any student in the college who has earned an E. I. monogram is eligible to belong to the club as an active member and any student who has earned the E. I. monogram, but is not in college, is eligible to join the club as an associate member. All members must first be initiated into the club before becoming regular members. The initiation for new members is held during the spring quarter of each school year.

**THE FORUM.**—Is a discussion group of students and faculty members who are especially interested in current economic, political, and social problems. Meetings are held bi-weekly throughout the college year. Active membership is limited to those who have prepared and presented a paper of merit on some related topic.

**PHI SIGMA EPSILON.**—The Beta Chapter of Delta Lambda Sigma, organized in the winter quarter of 1927-1928, has been incorporated in Phi Sigma Epsilon, a national fraternity for Teachers Colleges.

The purpose of the organization is to maintain a high standard of scholarship, to promote school spirit, and to cooperate actively with the school in every possible way.

The fraternity has a house in which the members may live and enjoy with one another a true feeling of fellowship.

**ATHLETICS.**—All athletic activities are conducted by the Athletic Council. This council is composed of two members of the faculty, appointed by the president; two students, elected by the

students; and the athletic coach. An athletic fee is charged each college student and each high school student as part of the students' activities fee. This fee is payable at the beginning of each quarter. It entitles the student to free admission to all athletic contests in which Teachers College or High School teams take part on the home grounds, and also a vote for the student representative on the Athletic Council. The Teachers College and the High School have separate teams and play independent schedules. The Eastern Illinois State Teachers College is a member of the Illinois Inter-collegiate Athletic Conference, and the High School is a member of the Illinois High School Athletic Association.

**ATTENDANCE AT CHURCH.**—Each student is expected to attend regularly the church of his choice, or that which meets the approval of his parents. The pastors and members of the different churches have made the students at home in the churches and Sunday schools. The teachers of the Teachers College encourage the students to form and sustain intimate relations with the churches.

**THE STUDENT COUNCIL.**—The Student Board of Control was merged with the old Student Council in the fall quarter of the year 1928-1929. The new Student Council was organized as a means of communication between the faculty and students and a way by which the students may aid in school discipline and in the general control of college affairs.

The Council now consists of eleven members: four from the senior class, three from the junior class, two from the sophomore class, and two from the freshman class. The term of office is one year. Elections take place in the respective classes at the second class meeting of the regular school year. The constitution provides for a president, vice president, secretary, treasurer, and historian.

#### ALUMNI CLUB

The Charleston Club of Chicago is an organization of former students. This club meets occasionally in a very pleasant way, and all former students or teachers, living in or near Chicago, will be notified of these meetings if they send their names to the president, Mr. Floyd E. Wilson, '20, 2150 Ewing Ave., Evanston, Illinois.

#### THE ALUMNI ASSOCIATION

The Saturday preceding commencement is Alumni Day with morning exercises at ten o'clock.

The officers for 1930 to 1931 are: Mr. Errett Warner, '25, President and Chairman of the Executive Committee; Mr. William H. Green, '27, Vice-President; Miss Antha Endsley, '12, Secretary and Treasurer.

TEACHERS' APPOINTMENT COMMITTEE

To assist school officers in securing capable teachers and to help graduates in securing desirable positions the Eastern Illinois State Teachers College has an appointment committee. Its services are free both to teachers and to school officers. It is very desirable that graduates of the college keep the committee informed of their location and position, so that the committee may make intelligent recommendations to superintendents desiring experienced teachers.

**PART II**  
**INSTRUCTION**

## ORGANIZATION

The Eastern Illinois State Teachers College includes:

The Teachers College—

The Senior College.

The Junior College.

The Training School—

The High School, Grades IX, X, XI, XII.

The Elementary School, Grades I-VIII.

## DIVISION OF THE YEAR

The regular college year consists of three quarters of twelve weeks each. Monday is taken as the weekly holiday. This plan gives teachers who have no school on Saturday opportunity to visit the Teachers College and promotes closer relations between the college and the teachers of the district.

A summer quarter of twelve weeks gives teachers and students an opportunity to study during the summer vacation. The summer quarter of 1931 begins on Saturday, June 6, and closes on Friday, August 28. It consists of two sessions of six weeks each, the first closing Friday, July 17. Students may attend either or both sessions.

The subjects offered are designed to meet the needs of:

1. Teachers of experience who wish to advance their professional or academic knowledge.
2. Supervisors and department teachers.
3. Those who are preparing to teach in schools that follow the Illinois Course of Study.
4. Those who wish to take regular work with a view to graduation from the Junior College with a diploma or from the College with a degree.

## ADMISSION REQUIREMENTS

1. *To the Senior College:* Graduation from the two-year curriculum of a recognized Teachers College or of the Junior College of a recognized college or university.

2. *To the Junior College:* Graduation from a recognized four-year high school.

3. *To the High School:* Graduation from the eighth grade admits a student to the ninth year which is the first year of the high school. High school students enter the year which the units they have already earned give them the right to enter.

4. *High school records must be sent to the Registrar. A student with high school or other record should have a complete copy of the record sent by the principal of the school to the*

*Registrar of the Teachers College. This should be done before the date of entering.*

*Township scholarships are presented at the cashier's office on registration day.*

### GRADUATION

The degree of Bachelor of Education (B. Ed.) is conferred upon those who complete a four-year curriculum; a diploma is granted to those who complete the two-year curriculum for preparation of teachers for the grades. A two-year diploma is granted in English and manual arts. Four-year curriculums prepare teachers for high school, for special grade work, and for positions as principals, supervisors, and teachers of special subjects. *A year's resident work is required for a diploma or degree.*

The University of Illinois admits to full graduate standing all graduates of the Teachers College who present twenty semester hours of content courses in one major academic subject in addition to education and not less than one year of college work in Greek, Latin, French, or German.

Students planning to do graduate work at the University of Illinois should see that their records satisfy the foreign language requirement.

Students planning to teach in high schools should see that their records satisfy the requirements of the Illinois Examining Board and of the North Central Association.

The records of those who expect to complete a curriculum in a current year are checked at the beginning of each quarter and on April 1. A statement of the courses necessary for the completion of his work is given to each of these students in the fall quarter and is used by him in making his programmes for succeeding quarters. The list of candidates for graduation is based on the checking of April 1. A student who is not more than sixteen quarter hours behind the class at that time may participate in commencement exercises with the class and receive his diploma or degree at the close of the summer quarter if he completes the work by that time. It is possible to earn sixteen quarter hours in the summer quarter.

### SCHOLARSHIP

#### I. Grades are expressed in letters as follows:

A, Excellent.....	3 grade points
B, Good.....	2 grade points
C, Fair.....	1 grade point
D, Poor, but passing*...	0 grade points
E, Condition.....	0 grade points
(incomplete work)	
F, Failure.....	—1 grade point

\*Passing, but not accepted toward graduation or toward admission to practice teaching if more than one-fourth of the student's courses receive a grade of D.

II. For graduation and for admission to practice teaching not more than one-fourth of a student's credits may have a grade of D; that is, three fourths of his grades must be C or above. This means that he must have a minimum of nine grade points in his freshman year in order to be admitted to practice teaching in the sophomore year; a minimum of eighteen grade points for graduation from the Junior College; and a minimum of thirty-six grade points for the degree.

III. Graduation with high honors requires that a student receive a grade of A in three-fourths of his work and B average in the rest.

Graduation with honors requires a grade of A in one-half of the student's work; B or higher in one-fourth of his work; and C average in the rest.

Graduation honors are noted on the diploma, announced at commencement and published in the next issue of the annual catalogue.

IV. Scholarship honors on the same basis as graduation honors are announced for each quarter in the month after the beginning of the next regular quarter; in December for the fall quarter; in March for the winter quarter; in October for the spring quarter and for the preceding year.

The announcement is posted on the bulletin board and printed in the "Teachers College News."

V. The grade F (failure) is recorded against a student who drops, after the first month, a course in which he is failing; but this does not apply to a student who is taking work to the amount of twenty quarter hours.

VI. A student whose class work is very poor or who is frequently absent may be excluded from the privilege of taking the final examination. A grade of F (failure) is recorded against him.

VII. A student failing in three courses, twelve quarter hours, in any quarter or in one-half of his work, eight quarter hours in each of two consecutive quarters is dropped from the college.

VIII. No freshman in a four-year curriculum may register for extra work in his first quarter.

No sophomore may register for extra work in the first quarter in which he is taking practice teaching.

No student whose average is below B in the preceding quarter may register for extra work.

## EXTENSION WORK

The Teachers College is glad to offer such extension work as its facilities permit. It is especially urged that such aid be sought as the college may be able to give in improving present teaching in the elementary schools. A skillful teacher in visiting schools and in talking with teachers is able to be of great assistance to those of less experience. This suggestion contemplates giving help in those subjects that make up the greater part of the elementary school curriculum, namely: reading, language and grammar, arithmetic, geography, history, drawing, and music.

No extension work is offered for credit toward graduation.

#### CREDIT

The unit of measure, beginning with the year 1929-30, is the quarter hour, representing one hour a week of prepared work for twelve weeks when the student load of prepared work is sixteen hours a week. It is equivalent to two-thirds of a semester hour.

A year's work is equivalent to 48 quarter hours (32 semester hours) of prepared work. A year's work in one subject is equivalent to 12 quarter hours (eight semester hours).

Instrumental music or voice work may be used for elective credit to the extent of 12 quarter hours (two years' work). No student may count toward graduation more than 12 quarter hours of instrument or voice work.

Credit is allowed for physical education, coaching theory (33, 34, 35, 36, 37, 38), and for Library 20 at the rate of one quarter hour for each quarter's work.

Credit is allowed for dramatics, College News, glee club, quartette, orchestra, and band at the rate of one quarter hour to those reported to the office for such credit at the close of each quarter by the directors of these organizations who decide the conditions under which credit is allowed or withheld in each case.

Credit earned in physical education, library use, dramatics, College News, glee club, quartette, orchestra, or band is in excess of the 96 quarter hours required for a diploma and of the 192 quarter hours required for a degree.

The credit is recorded on the student's permanent record card and may play an important part when he is an applicant for a position.

A statement of the amount of credit is included in the description of each course.

### NUMBERING OF COURSES

Courses numbered 1-19 are for credit below the Junior College; courses numbered 20-29 are (with a few exceptions) required in a curriculum in the Junior College; courses numbered 30-39 are elective courses for those in the Junior College; courses numbered 40 or above are Senior College courses. Courses numbered 1-19 do not count in the College.

### MAJOR AND MINOR SUBJECTS

In four-year curriculums for graduates of four-year high schools, a student in a special curriculum takes 48 quarter hours of work in a major subject and 24 quarter hours in a minor subject, in some cases specified by the department of the major subject and in other cases left to the student's choice, but the courses in the minor subject must constitute two years' work in some one department and the courses chosen must be satisfactory to that department and to the department of the major subject. Students will consult the department of the major subject as to choice of minor subjects and of electives.

Students taking mathematics as the minor subject take Algebra 31, 32, 36, Trigonometry 33, Analytics 34, 35.

In music only public school music may be used as the minor subject, the courses required being Music 32, 33, 34, 35, 36, 37.

In English, English 30, 31, 34, 35, 36 (or 43), 37 (or 39) may be used as the minor subject. English 46, 47, 48 may be used by Juniors or Seniors for credit toward the English for minor subject.

## TRAINING SCHOOL

ORGANIZATION AND ADMISSION.—The Training School consists of the Elementary School of eight grades, and the High School of four grades. Below the ninth grade the number of pupils who can be admitted is limited. Pupils desiring admission are registered, then admitted in order of registration when vacancies occur.

Pupils once admitted to the school for the regular school year retain their places until completing the course unless they are unreasonably irregular in attendance or fail to appear on the

opening day of the school year without notice to the director of their intention to appear later.

In grades below the ninth, a fee of seventy-five cents is charged on the opening day of each of the three terms of the year.

**THE HIGH SCHOOL.**—The Teachers College High School is recognized by the State Department of Education and is accredited by the University of Illinois and by the North Central Association of Colleges and Secondary Schools. Those who have completed the eighth grade may enter the ninth grade which is the first year of a four-year high school. Full credit is allowed to students entering from other accredited high schools. Sixteen units are required for graduation. Graduates of The Teachers College High School are admitted to the freshman class of the College.

*Electives*

The high school curriculum includes ten required and six elective units. One unit of physical science is required. Those who wish to have both physics and chemistry take one in the eleventh year and the other in the twelfth year.

Electives are in two groups. All electives may be chosen from Group I; not more than four units may be chosen from Group II.

**TRAINING TEACHERS.**—In the first nine grades the immediate direction of the work of each grade and the responsibility for its progress is with the training teacher of the grade. The training teachers, with the director, plan the work of their grades, discuss with the student teacher their plans for teaching the different subjects, do enough of the teaching to keep the progress of the pupils at least up to the standard of city schools of the same type, and teach special lessons for the observation of Teachers College classes in method of teaching the special subjects. The character of the work of the training teacher determines almost entirely the success of the Training School in accomplishing its purpose.

In the seventh, eighth, and ninth grades, each of the teachers has department work in the three grades. A training teacher for history has charge of that work in grades five to eight inclusive. A training teacher for music has charge of the music in grades one to eight. A training teacher for drawing has charge of the drawing in grades one to eight. The teachers in other departments of the Teachers College have in all cases an advisory relation to the Training School and in some cases a supervisory relation. Senior College students have two quarters of practice

teaching in the College High School which is a training school for teaching in high school.

**PURPOSE.**—The purpose of the Teachers College in maintaining a Training School is twofold. It needs a pedagogical laboratory in which students and members of the faculty may test the methods of instruction and the pedagogical theories taught in the Teachers College. And to develop in the students craftsmanship in teaching they must have opportunity to observe expert work and to develop skill by actual experience in teaching.

The results, however, cannot be secured unless the Training School itself is aiming at the best possible education for the boys and girls who are pupils in the school. If the Training School is not securing for its pupils results up to the standard of good schools of the usual type, it is not best adapted to its purpose as an experiment school, and if it is not at least equal to other elementary schools it is certainly not adapted to secure the best results as a school of observation and practice.

**PRACTICE TEACHING.**—All students graduating from the Teachers College in the two-year curriculum are required to take throughout their second year a course in practice teaching. The first quarter the student is assigned to teach in the lower four grades or in the upper four grades as he chooses; the second quarter, in the group of grades not chosen for the first quarter; and the third quarter, in the grade, if possible, in which he thinks his future teaching is to be done.

Student teachers are assigned to training teachers by the director and are assigned by the training teacher to particular teaching duties for one fifty-minute period each day. In the beginning of the first quarter the student makes plans for teaching the lessons in his assigned subject after discussing the subject matter and the procedure with the training teacher, but for one or two weeks the teaching is done by the training teacher, the student observing. Gradually the teaching is turned over to the student, the training teacher observing and discussing the lessons and lesson plans before and after the student teaches the lesson. Each training teacher holds one general meeting each week with her group of students, besides special conferences with individuals. She also does as much of the teaching as seems necessary to keep the class up to standard and to furnish the student opportunity to observe expert teaching.

Students taking a four-year curriculum take one quarter of practice teaching in the Elementary Training School in their second year. Two quarters of teaching, one in the major subject and one in the major or minor subject, are required of them in

the Senior College. The College High School is the Training School for those who are preparing to teach in high schools.

OBSERVATION AND PARTICIPATION.—In the first year all students are required to take work in observation in the Training School. The work is designed to prepare them to meet the problems of teaching which they must meet in their course in practice teaching, to enable them to see the application of their course in psychology, and to assist them in selecting the group of grades in which they wish to teach. Opportunity is given to observe both the room management and the teaching of the training teacher. Some opportunity is offered to assist in the management and in the planning of lessons.

Note: Beginning with the fall quarter, 1928-29, a change was made in the content of the three courses in education required of freshmen and called "Psychology 20, 21, 22." The new courses are now listed as Education 20, 21, 22.

Those who have had the old "Psychology 20" should complete the year's work by taking the new Education 20 and 22. Those who have had the old "Psychology 20, 21" complete the year's work by taking Education 22.

Students who have not had the old "Psychology 20, 21, 22" take the new courses in education listed here as "Education 20, 21, 22."

20. AN INTRODUCTION TO EDUCATION. This course is intended to provide the student with a general view of the more important phases of a teacher's work. The meaning and the interrelation of the following matters form the subject matter of the course: the organization of public education; the teacher's relation to other school officials; school property; the materials of education; methods of using school material; the learning process; qualifications of teachers; the purpose of public education. The succeeding courses in education deal in greater detail with the several topics introduced in this beginning course.

## THE USE OF THE LIBRARY

Certain courses offered in the College require considerable work in the library, including reading, and looking up references, and assigned topics. To do this work with the wisest expenditure of time and effort, students should know how to use the card catalogue, magazine indexes, and some common reference books. Lessons, required of all students, are given in the eleventh year of the high school and freshman year of the college. An effort is made to have these lessons prepare for library work required of students in other courses.

Life histories, relations to surroundings, and economic importance of common animals in the principal animal habitats found in the Charleston region which are (1) the open field or prairie, (2) the forest, (3) stream or pond, and (4) household and home premises. Methods of collecting and preserving material, both living and non-living, are emphasized. The course gives a foundation for elementary science teaching in graded schools, where animal materials are used.

*Elective in the eleventh and twelfth years. Six hours a week. One-third of a unit. Spring quarter.*

#### College
