CHAPTER I

CRITERIA PROJECT WAS BASED UPON

The project under consideration and evaluation is a two-fold one funded under a single grant. The project includes establishing an instructional materials center and creating a reading improvement program for the Dieterich Community Unit #30 School District. In order to effectively evaluate the two projects, it is necessary to state the objectives of the program and the educational needs for which the project was designed.

Educational Needs of the Students in Relation to the Project

The following are the educational needs for which the project was designed to meet and aid in solving:

1. Dieterich Community Unit School District, for some time, has been concerned with educational problems inherent in a relatively small geographic area. In a substantial part of the district, the economy has been adjusted for many years to the stark realities of poverty. For some time, educational goals have been set and under adverse conditions a number of our students have attained excellence. However, too many of our students have not been able to attain excellence nor come within sight of excellence due to limited resources and problems directly identified with educational deprivation.

2. Our teachers are well trained and have abilities comparable with the very best; however, due to the scarcity of equipment and materials, they have taught under frustrating circumstances.
3. A comprehensive study of our system's resource materials finds us lacking in many areas. Materials considered by more wealthy systems as necessities have either not been available at all or only on a very limited basis for use by our teachers in the teaching-learning process. Therefore, since the incidence of poverty is so prevalent in the Dieterich area, even those few who are more fortunate economically are actually educationally deprived.
4. Too many students have been exposed to a culture far below the ideal, and also far below the culture in which they are expected to live and compete in the future.
5. Even though the school environment applies to all groups, the minority cultural groups face greater adverse forces both economically and socially.
6. There is a vicious cycle of socio-economic conditions existing, passing from parent to child. Acceptable goals set forth by parents are primarily goals they have reached.
7. Many homes are devoid of any printed materials. Noticeable is a lack of daily newspapers, quality periodicals, magazines or reference books. Therefore, prior to entering school the vocabulary is limited; and the amount of reference materials in the home do not aid the child in developing the vocabulary learned while in school.

8. Reliability of information given the child in the home by adults is questionable or inadequate. These handicapped children and adults have a narrow range of experiences due to a lack of exposure.
9. Drop-out rate (high school): 4 out of 161 students, or 2.4%.
10. Improvement of reading is already a part of our overall program. However, our program is not as extensive, nor does it have the necessary depth to cope with this ever-present and increasing problem. For some time we have identified the slow reader, the one reading below his capabilities, and those who refuse to read due to psychological difficulties. This project includes special provisions for the improvement of reading.

Objectives of the Program

The objectives which are planned to be attained through the program are as follows:

1. To provide the very best materials for our school children in order for them to have equal educational experiences.
2. To develop each individual's highest potential.
3. To develop skills and impart knowledge for attaining individual goals.
4. To enrich most experiences of a life which thus far has had little, if any, enrichment.

5. To positively motivate each student.
6. To prepare him for greater service to his community and develop him into a finer citizen.
7. To prepare him for productive decisions which he alone can make.
8. To make the word "equal" more than just a word.
9. To prevent the potential "drop-out".
10. To provide stimulating experiences for experiential exploration.
11. To provide him with the necessary insights whereby he can rise above his socio-economic background.
12. To provide the student with a pride for his heritage.
13. To provide stimuli for investigation in richer more meaningful reading experiences.

Educational Services to be Provided

The educational services and activities provided by this proposal are primarily to provide materials both for utilization and experimentation and staff to satisfactorily initiate and carry through an effective program for the educationally disadvantaged. Specifically these services and activities are:

1. To provide equal educational opportunities, sufficient amounts of materials of all kinds for creative use, for experimentation, and for immediate utilization.

2. Educationally sound building level materials to be housed in the Dieterich Elementary School.
3. Materials to be used in classroom instruction, individual developmental procedures, improvement of reading, in-service training programs, prelude to field trips and with consultant services.
4. The center to be stocked and staffed where teachers can develop teaching materials applicable to specific and general needs.
5. Space and materials to be provided for teachers to
 - A. Preview, review and audition materials applicable to the particular teaching situation.
 - B. Gather for in-service training:
 - (a) use of various materials
 - (b) develop production techniques
 - (c) operation and utilization of equipment
 - (d) usage of newly adopted programs, materials and equipment
 - (e) correlate activities for related uses of materials
6. In-service training to involve the staff and:
 - A. Consultants from the State Department of Public Instruction.
 - B. Consultants from educational media, producers and publishers.
 - C. Consultants from equipment manufacturers and distributors.
7. As many local citizenry to be used as possible since we endeavor to promote and stimulate local leadership.

8. The State Department of Public Instruction to be kept informed of the progress of the projects through periodic and annual reports.
9. This center to serve in a resource capacity for adult education programs through all agencies who are engaged in this type of service. Disadvantaged children in Headstart programs and schools in the area served by Dieterich Community Unit #30 to be asked to participate in this wealth of materials.

Dissemination of Information

The following are methods by which the dissemination of information was carried out:

1. All materials were catalogued by subject and grade level and a copy of this catalogue will be a part of each teacher's professional literature.
2. All materials were correlated with all basic textbooks in use in the district.
3. Teachers, principals and supervisors were constantly informed of new materials and equipment as such becomes available.
4. Talented teachers who developed materials peculiar to Dieterich, had information on such materials distributed to other teachers who had like interests.

5. Reports on the activities of this project were prepared by the Director for the Systems, Board of Education, the State Department of Public Instruction, U.S. Office of Education, and institutions of higher learning directly connected with this project and Community Action groups.
6. As the need arose, specialists in the various media fields were encouraged to present their talents for depth and effectiveness.
7. The new media were kept informed of the center's activities in order that those most closely identified with the project may be better informed.

Time Schedule

The proposed times schedule of the planning and termination of the instructional materials center was as follows. Upon the projects approval the following plans went into effect:

1. Instructional materials and audiovisual center.
2. Hiring of staff.
3. Evaluation procedures for purchase of equipment and material.
4. Purchase of equipment and materials.
5. In-service training sessions for those who utilized the equipment and materials.
6. Establish shelves, catalogue and book procedures for most effective utilization.

At present, it is anticipated that the terminal point of the center will never be reached. With this initial assistance from governmental sources, this center will be a continual growing aspect of the full educational program of Dieterich Community Unit #30. After the completion of two years of funding under Title I of Elementary and Secondary Educational Act, additional instructional materials and equipment will be added to the district's schools to keep the center effective.

Cost of Project

The staff of the instructional materials and audiovisual film center consisted of a director and one secretary-booking clerk. The director's office and his immediate staff was located at the Dieterich Elementary School serving Eberle, Elliottstown, Dieterich and Montrose Schools.

School	Enrollment	Eligible Pupils Low Income Families	Percentage
Dieterich High School	167	35	20.95
Dieterich Grade School	173	39	22.5
Montrose Grade School	95	21	21.1
Elliottstown Grade School	57	14	25.
Eberle Grade School	75	17	22.9

Utilization Equipment

3 16 mm projectors, @ \$480.	\$1,440.00
3 35 mm film projectors, @ \$125.	375.00
3 tape recorders, @ \$160.	480.00
6 room darkening shades, @ \$150.	930.00
3 record players, @ \$60.	180.00
6 overhead projectors, @ \$140.	840.00
10 filmstrip viewers, @ \$15.	150.00
3 projection stands, @ \$35.	105.00
1 record storage cabinet	30.00
1 filmstrip storage cabinet	100.00
8 portable room screens, @ \$26.70	213.60
Kits and trainers for teacher and student use	676.87
Microscope slides	83.20
Transparencies (various fields)	721.00
100 filmstrips (various fields)	600.00
Models and charts	300.75
Total	\$7,225.42

Production Equipment

1 Polaroid $3\frac{1}{4}$ x 4	\$150.00
1 paper cutter and files	180.00
1 light table	168.00
1 Thermofax 3m Model 45CA	345.00
Total	\$843.00

Production and Demonstration Materials

Overhead Projector Supplies	\$200.00
Polaroid Supplies	50.00
Miscellaneous Production and Demonstration Materials	200.00
Total	\$450.00

Personnel

Director - Superintendent, Unit #30	No Salary
1 Booking Clerk-Secretary	\$1,500.00

Travel

Mileage and Expenses	300.00
(to be paid for transporting supplies and teaching materials from center to schools)	

Office Equipment

1 Desk (Secretary-Cooking Clerk)	165.00
1 Work table	90.00
1 File cabinet (letter size, locked)	75.00
1 16" typewriter	330.00
Chairs	150.00
1 Film booking cabinet	80.00
1 Large type typewriter	330.00

Total	\$1,220.00
-------	------------

Office Supplies	\$150.00
-----------------	----------

Remodeling

The remodeling of a room for the educational materials center consisted of plastering walls, painting and building two storage shelves.

Cost	\$191.90
------	----------

Total Cost of Project	\$11,688.42
-----------------------	-------------

A complete breakdown of the material available in the instructional materials center is found in Appendix A. In evaluating the instructional materials center by actual use at the different attendance centers, Appendix A was used.

CHAPTER II

EVALUATION OF THE INSTRUCTIONAL MATERIALS CENTER

A type of process evaluation, that is by the amount of equipment checked out by the teachers at the different attendance centers, served as a method of evaluating the instructional materials center. There were five attendance centers being served by the materials center. A listing of these by school, grades taught, enrollment and the number of teachers at each of the attendance centers was used in the final evaluation of the materials center.

Eberle Grade School	Grades 1,2,3, & 4	3 teachers	75 students
Elliottstown Grade School	Grades 5,6,7, & 8	2 teachers	57 students
Montrose Grade School	Grades 1 through 8	4 teachers	95 students
Dieterich Grade School	Grades 1 through 8	7 teachers	175 students
Dieterich High School	Grades 9 through 12	12 teachers	167 students

Eberle and Elliottstown are served by the same principal. Montrose has a principal, while the Dieterich Grade School and the Dieterich High School are under the direct supervision of the superintendent.

Objective Evaluation of the Instructional Materials Center

The amount and types of material available through the instructional materials center seemed to be adequate in most fields. The collection of audiovisual materials was excellent. Eighty percent of the district's Title I funds were used for purchasing audiovisual equipment and instructional material. This material was listed and each member of the teaching staff had a list of the materials and equipment available in the unit. However, the availability of fine materials did not necessarily mean that the materials were utilized to their full extent.

Several factors combined contributed to the fact that the instructional materials center had not attained one of its primary goals; that is, the involvement of the students individually. The apparent reasons the individualized student participation was not attained were: First, the student schedule available was not conducive to individual work or work with the materials available. Second, the space available at the present location of the instructional materials center is too limited for student work. Third, the location of the center is not conducive to student use. The center should be located adjacent to and operated in conjunction with the library; where perhaps, the students would be more motivated to use the materials.

Many of the teachers within the unit have failed to utilize the center for a variety of reasons. However, the most prevalent reason was simply a lack of understanding of what materials were available and how to co-ordinate the materials with classroom experiences. If the teachers are to obtain the most benefit from the instructional materials center, there must be provisions made for the teachers to become familiar with the equipment and materials available. Once teachers are made aware of the teaching aids available, this awareness must be enforced by making the materials readily available. To encourage use by teachers, released teacher time should be made available for investigation and preparation of materials.

From the preceding information, it becomes apparent that for an instructional materials center to operate to its fullest capacity, there is a dire need for a person to co-ordinate the materials available with classroom use. This person could inform the classroom teacher, through workshops and individual consultation, of the teaching aids available and how they could best be used in the classroom. There is also the need for a person, such as a guidance counselor, to co-ordinate the use of the material with individual students for greater stimulation and motivation.

If provisions are not made for the individual classroom teacher to be made aware of the teaching aids available and how to use them;

and if the material is not readily available to students, an instructional materials center will fail to function effectively and the materials available merely sit, look nice and collect dust.

CHAPTER III

THE REMEDIAL READING PROGRAM

Information Pertaining to the Reading Program

The second program under the one entitlement was the reading improvement program. The purpose of this project was to improve the reading of students who had not reached a standard of reading that was acceptable according to ability. This program was designed primarily for students in grades one through four, although a few students from the upper grades had been enrolled in the program. Students were generally admitted into the program by referral from the classroom teacher or the principal. Students who had been retained in the first four grade levels were also eligible for the program. The program dates for this evaluation were from September 1, 1966 through May 31, 1967. The schools involved in this project and their enrollment are listed below.

Attendance Areas	Enrollment	Low Income Families
Dieterich Grade School	175	39
Eberle Grade School	75	17
Montrose Grade School	95	21

Budget for the Remedial Reading Program

Program Expenditures

A. Instructor's Salary	\$5,000.00
B. Traveling Expenses	300.00
Total	\$5,300.00
C. Equipment	
Consumable Supplies	\$ 100.00
3 Controlled Readers	765.00
25 Readiness Filmstrips	87.50
25 Pre-primer Filmstrips	45.00
50 First Grade Filmstrips	90.00
50 Second Grade Filmstrips	90.00
25 Third Grade Filmstrips	45.00
25 Fourth Grade Filmstrips	55.00
25 Third Grade Comprehension Power	55.00
25 Fourth Grade Comprehension Power	55.00
1 Question Files, Grade 1	37.50
1 Question Files, Grade 2	37.50
1 Question Files, Grade 3	37.50
30 Study Guides, Grade 4	36.00
1 Teacher's Guide	.30
150 Individual Progress Charts	1.50
3 70" by 70" Projection Screens	80.10
Total	\$1,617.90
Total Cost of Project	\$6,917.90

Objective Evaluation of the Remedial Reading Program

From all evidence gathered, the remedial reading program has been a success. It should; however, be kept in mind when observing the improvement of the students in the reading program that some of the bases for improvement could be from other areas. Three other possible reasons for student improvement could be: the student attaining a readiness to read, normal classroom work or influences from the home. After discussing these possibilities with classroom teachers of students involved in the program, the teachers tended to credit the remedial reading instructor and her program with much of the reading success attained by the students.

A reading program of the type offered, with emphasis on the first four grades, can provide for improvement for those students who are already experiencing difficulty in reading. It has been apparent for some time that poor reading ability coincides with poor academic success, and the time to aid these poor readers is in the first four grades.
